Please replace the Abstract of the Disclosure originally filed with the above-identified patent application with the following new Abstract of the Disclosure:

ABSTRACT OF THE DISCLOSURE

A surface mountable device includes a ceramic substrate including a first principal surface, a second principal surface, and a side surface connecting the first principal surface to the second principal surface, a terminal electrode disposed on the first principal surface, and a first conductor for appearance inspection extending continuously from the terminal electrode to the side surface and having a width smaller than the width of the terminal electrode.
